Next Destination
Assignment - 1
Jeffrey Neil Dsouza - 200429461

Description :

My next destination app allows users to find a new travel adventure through the app. The app selects a random location for the user to explore while giving the users last known location(current location).
Instructions to use the app:

1. The user will have to Sign In with fingerprint authentication
2. On login, you will find two buttons
    a. Go button: will generate the current location as well as a new destination. This will also generate a notification.
        i. On opening the notification you will see the new set destination
        ii. The notification can also be expanded to new your destination history(previous 5)
    b. View on Map button: will allow you to see the new set destination on the map with a flag pin on the exact location
3. On Opening the map you will view the map with default settings and the map view can be changed by clicking the menu options on the right top menu options with 4 settings.
    a. Normal View
    b. Hybrid View
    c. Satellite View
    d. Terrain View
4. Widget: Contains a button that will take you to the home page to select a new destination.
